

Check-list of the Family Lamiaceae in Pernambuco, Brazil

Cecília de Fátima C. B. R. de Almeida and Ulysses Paulino de Albuquerque*

Laboratório de Etnobotânica e Botânica Aplicada (LEBA); Departamento de Botânica; Centro de Ciências Biológicas; Universidade Federal de Pernambuco; upa@npd.ufpe.br; Recife - PE - Brazil

ABSTRACT

A survey of the family Lamiaceae in the state of Pernambuco revealed the presence of 20 genera encompassing 46 species. The genera with the highest number of exsiccatae were Hyptis and Ocimum; others had little representative material, and some taxa were collected only once. Regarding the phytogeographical distribution in the state, 9.1% of the registrations of species occurred in the coastal zone, 54.5% in the forest zone and 36.3% in the caatinga zone.

Key words: Lamiaceae, floristic survey, check-list

INTRODUCTION

The family Lamiaceae includes approximately 220 genera (Hedge, 1992) and 3.500 to 4.000 species (Harley, 1988; Hedge, 1992). With wide distribution, it has cosmopolitan representatives (*Salvia* and *Scutellaria*), and is especially abundant in the Mediterranean region. It grows in several habitats and altitudes: from the Arctic regions to the Himalayas, southeast Asia to Hawaii, Australia, Africa, and the New World from north to south (Heywood, 1978). It is a typical savanna family, inhabiting warm areas around the world (Harley, 1988).

In northeastern Brazil, floristic and taxonomic information on the family Lamiaceae is very sparse, consisting mainly of records of new species. With exception of the contributions of Harley (1995, 1996) for the state of Bahia, little is known about the species occurring in the states of the northeast region. Specifically in Pernambuco, the family has not yet received a systematic treatment, with records sparsely distributed in a

vast literature of mainly floristic surveys. Among others, the following species are reported for the state of Pernambuco: *Hyptis fruticosa* Salzm. (Andrade-Lima, 1960), *H. lantanifolia* Poit. (Andrade-Lima, 1966), *H. suaveolens* (L.) Poit., *Leonotis nepetifolia* R. Br. (Silva, 1985), *Scutellaria agrestis* St. Hil. (Epling and Toledo, 1943), *Hyptis lappulacea* Mart. ex Benth., *H. pectinata* (L.) Poit., *Leucas martinicensis* R.Br (Pereira, 1965), *Marsypianthes chamaedrys* (Vahl) Kuntze (Pereira and Pereira, 1973), and the genus *Ocimum*, which is receiving a series of treatments (Albuquerque and Andrade, 1998a,b; Albuquerque, 1998, 1999).

In this work a preliminary survey on the family Lamiaceae for Pernambuco state is presented. Data on geographic distribution of the recorded species is also provided.

* Author for correspondence

MATERIALS AND METHODS

The present research was based on the analysis of material collected in the state of Pernambuco, as only the material identified and/or confirmed by specialists of the family has been included. The examined exsiccatae were obtained from herbaria and listed with the respective abbreviation according to Index Herbariorum (Holmgreen et al., 1990): IPA (Herbarium "Professor Dárdano de Andrade Lima), of the Empresa Pernambucana de Pesquisa Agropecuária, Recife, Pernambuco, Brazil; PEUFR (Herbarium "Professor Vasconcelos Sobrinho"), Departamento de Biologia of the Universidade Federal Rural de Pernambuco, Recife, Brazil; UFP (Herbarium "Professor Geraldo Mariz"), Departamento de Botânica, Centro de Ciências Biológicas of the Universidade Federal de Pernambuco, Recife, Brazil.

The data on physical environment, habitat, plant habit, vernacular names and other information, when available, were obtained from exsiccatae labels. The material examined was cited according to subfamily. Each genus was listed by species, with locality, collection date, name and number of collector and abbreviation of herbaria. The accession number of the herbarium identifies the specimens with no collector number. Cultivated or exotic species are marked with an asterisk.

A brief analysis of the geographical distribution of the species in the state of Pernambuco was carried out, excluding the cultivated species. The phytogeographic division of Pernambuco as proposed by Andrade-Lima (1960), was adopted. The data on general distribution in Brazil and in the world, were obtained according to available literature.

RESULTS AND DISCUSSION

In Pernambuco the family has been represented by 46 species within 20 genera: *Aeollanthus* (1 sp), *Eriope* (2 spp), *Hesperozygis* (1 sp), *Hypenia* (1 sp), *Hyptis* (17 spp), *Leonotis* (1 sp), *Leonurus* (1 sp), *Leucas* (1 sp), *Marsypianthes* (1 sp), *Mentha* (2 spp), *Ocimum* (7 spp), *Plectranthus* (2 spp), *Pogostemon* (1 sp), *Raphiodon* (1 sp), *Rosmarinus* (1 sp), *Salvia* (2 spp), *Satureja* (1 sp), *Scutellaria* (1 sp), *Solenostemon* (1 sp) and *Tetradenia* (1 sp). About 39% of these are exotic

and/or cultivated species. The species *Leonotis nepetifolia* (L.) R. Br., *Leonurus japonicus* Houtt and *Leucas martinicensis* L., are cosmopolitan, occurring as ruderals and as weeds in Brazilian territory.

The genus *Hesperozygis* was found in the southern states of Brazil and has been never reported for the Northeast. It was the result of only one collection at the Campus of the Universidade Federal Rural de Pernambuco in 1979, and was identified by the specialist R.M. Harley, who stressed the particularity of its distribution. However, there are still too few collections for Pernambuco, with a number of taxa that were collected only once, such as *Satureja* sp., *Scutellaria agrestis* St. Hil. and *Leonurus japonicus* Houtt.

The tribe Ocimeae of the subfamily Nepetoideae was the best represented. The genera *Ocimum* and *Hyptis* were the most representative with respect to the number of species. Hytidinae was represented by five genera: *Hyptis*, *Hypenia*, *Eriope*, *Marsypianthes* and *Raphiodon* (monotypic genus of eastern Brazil). In the study carried out by Harley (1996) the two largest genera in Bahia were *Hyptis* (51) and *Eriope* (17). Harley (1996) mentioned that the genus *Eriope* is typically Brazilian, particularly on rupestrian fields, having its center of diversity in the Chapada Diamantina, with secondary centers in Minas Gerais and Goiás. In Pernambuco this genus was represented by two wide distributed species: *Eriope crassipes* Benth. and *E. cf. macrostachya* Mart. ex Benth.

With respect to geographical distribution, 9.1% of species occurred in the coastal zone, 54.5 % in the forest zone and 36.3% in the caatinga zone. There was a higher number of collections for the forest zone. The genera with the widest distribution in Pernambuco were: *Hypenia*, *Hyptis*, *Marsypianthes*, *Leonotis*, *Ocimum* and *Raphiodon*. The genus *Hyptis* occurs from the coastal zone to the caatinga. The collections for the coastal zone also include many specimens of the genus *Ocimum*.

The species and examined material are listed below:

Subfamily *Scutellarioideae*

Scutellaria L.

Scutellaria agrestis St. Hil.

It occurs in north and central Brazil, from north Minas Gerais to Pernambuco (Epling and Toledo, 1943). Occurs in the forest zone of Pernambuco.

Material examined: PERNAMBUCO: **Tapera**, Ipojuca, VIII/1930, *Pickel s.n.*, IPA 4797.

Subfamily *Lamioideae*

***Leonotis* (Pers.) R. Br.**

***Leonotis nepetifolia* (L.) R. Br. ***

Vernacular: Cordão-de-frade, cordão-de-São-Francisco.

It inhabits open and dry areas throughout Brazil. In Pernambuco occurs from the coastal zone to the caatinga zone.

Material examined: PERNAMBUCO: **Buíque**, Vegetação arbustiva densa, 18/VIII/1995, *Andrade 160 and Figueiredo*, PEUFR 22699. **Carpina**, Campus do CENTREINO-EMATER, 23/VIII/1986, *Lima et al. 11*, IPA 48964. **Idem**, 1986, *Bedi 4*, IPA 51412. **Caruaru**, 25/IV/1995, *Albuquerque 45*, UFP 11035. **Idem**, 25/IV/1995, *Albuquerque 44*, UFP 11036. **Floresta**, Estrada Ibimirim-Floresta, XI/1985, *Ataide et al. 684*, IPA 48946. **Idem**, XI/1985, *Ataide et al s.n.*, PEUFR 8523. **Gravatá**, Serra das Russas, 30/VIII/1959, *Tavares 515*, UFP 325. **Ipojuca**, Área Projeto Suape, 23/XI/1977, *Andrade-Lima and Medeiros-Costa 96*, IPA 22292. **Maraial**, 24/IV/1997, *Baracho 555 and Siqueira 545*, UFP 18671. **Olinda**, VII/1929, *Pickel s.n.*, IPA 4798. **Recife**, 26/IX/1997, *Conceição 9*, PEUFR 22575. **Idem**, Cidade Universitária, 3/V/1984, *Silva s.n.*, UFP 4280. **São Lourenço da Mata**, Engenho Bela Rosa, 1/IV/1982, *Chiappeta 118*, IPA 32018. **Idem**, 13/IX/1983, *Chiappeta et al. s.n.*, IPA 32142. **Idem**, 13/IX/1983, *Chiappeta et al. s.n.*, PEUFR 7269. **Taquaritinga do Norte** 7/VI/1995, *Albuquerque 76*, UFP 11050.

***Leonurus* L.**

***Leonurus japonicus* Houtt**

= ***Leonurus sibiricus* auct. non L. ***

Vernacular: Cordão-de-frade.

It is native to Asia (Corrêa, 1969). Occurs in forest zone of Pernambuco, and much of northeast Brazil.

Material examined: PERNAMBUCO: **Tapera**, Ipojuca, 23/VIII/1934, *Pickel s.n.*, IPA 7011.

***Leucas* R. Br.**

***Leucas martinicensis* L. ***

Vernacular: Cordão-de-frade.

Native to Equatorial Africa, and is perhaps the Lamiaceae with the largest area of dispersion (Epling and Toledo, 1943). Widely distributed

throughout Brazil. Occurs in forest zone of Pernambuco.

Material examined: PERNAMBUCO: **Carpina**, 1986, *Bedi 5*, IPA 51413. **Tapera**, Ipojuca, VII/1930, *Pickel s.n.*, IPA 4800.

Subfamily *Nepetoideae*

Tribe *Mentheae*

***Mentha* L.**

***Mentha arvensis* L. ***

Vernacular: Hortelã.

It is an introduced plant from Europe, well adapted to South America. Cultivated for medicinal purposes.

Material examined: PERNAMBUCO: **Olinda**, Centro Nordestino de Medicina Popular, VII/1998, *Santana s.n.*, IPA 57048.

***Mentha pulegium* L. ***

Vernacular: Poejo.

Plant of European origin, well adapted to South America (Lainetti and Brito, 1980). It may also be found in Occidental Asia and Septentrional Africa (Corrêa, 1974; Morgan, 1997). Cultivated as medicinal in throughout Pernambuco.

Material examined: PERNAMBUCO: **Recife**, Ibura, 19/VIII/1991, *Krusch s.n.*, PEUFR 11537.

***Salvia* L.**

***Salvia farinacea* Benth. ***

Vernacular: Salvia.

It is native to Mexico (Corrêa, 1975). Cultivated as ornamental in Pernambuco.

Material examined: PERNAMBUCO: **Correntes**, XI/1929, *Pickel s.n.*, IPA 4802. **Recife**, 28/IX/1965, *Vasconcelos Sobrinho 10*, PEUFR 9875.

***Salvia splendens* Sellow**

Vernacular: Cardeal-do-Brasil, sangue-de-Adão, pé-de-chumbo.

Ornamental species, exclusively from Brazil. Much cultivated by horticulturists of Europe. In Pernambuco it is widely used in gardening.

Material examined: PERNAMBUCO: **Recife**, Graças, s.d., *Leão s.n.*, UFP 1511. **Idem**, Dois Irmãos, *Silva*

s.n., UFP 1544. **Tapera**, Campo Alegre, Ipojuca, 18/IX/1931, *Pickel s.n.*, IPA 4803.

***Hesperozygis* Epling**
***Hesperozygis* sp.**

It is a genus widely distributed in southern Brazil, without references for the Northeast. According to Pereira and Pereira (1973) five species occur in Brazil. It occurs in forest zone of Pernambuco.

Material examined: PERNAMBUCO: **Recife**, Dois Irmãos, 21/X/1979, *Barreto 11*, PEUFR 5939.

***Rosmarinus* L.**

***Rosmarinus officinalis* L. ***

Vernacular: Alecrim, alecrim-de-cheiro.

Native to South Europe, it also occurs in North Africa and in the Middle East (Castro and Chemale, 1995).

Material examined: PERNAMBUCO: **Limoeiro**, Lagoa Funda, 21/XI/1928, *Pickel s.n.*, IPA 4796. **Recife**, 27/II/1985, *Pires 7*, UFP 4275. **Tapera**, Ipojuca, XII/1926, *Pickel s.n.*, IPA 7007.

***Satureja* L.**

***Satureja* sp.**

It was found in forest zone of Pernambuco.

Material examined: PERNAMBUCO: **Tapera**, Ipojuca, 9/XI/1932, *Pickel s.n.*, IPA 7013.

Tribe *Ocimeae*

***Ocimum* L.**

***Ocimum americanum* L. ***

Vernacular: Manjericão, manjerona.

Plant of African origin, widespread in Tropical America and cultivated throughout Brazil (Corrêa, 1974; Albuquerque and Andrade, 1998a).

Material examined: PERNAMBUCO: **Afrânia**, 21/IV/1971, *Heringer et al. s.n.*, IPA 19105. **Idem**, 21/IV/1971, *Heringer et al. s.n.*, PEUFR 4229. **Carpina**, 22/IV/1997, *Lima and Rita s.n.*, IPA 50866. **Macaparana**, 7/VI/1995, *Albuquerque 84*, UFP 13882. **Olinda**, 1915, *Pickel s.n.*, IPA 4830. **Recife**, Margem do Capibaribe, III/1938, *Vasconcelos Sobrinho s.n.*, IPA 672. **Idem**, Cidade Universitária, 24/V/1985, *Silva s.n.*, UFP 4403. **Idem**, Cidade Universitária, s.d., *Costa s.n.*, UFP 1638. **Russinha**, Pombos, 6/VI/1934, *Pickel s.n.*, IPA 4832. **Serra Talhada**, 10/V/1971, *Heringer et*

***Ocimum basilicum* L. ***

Vernacular: Alfavaca, alfavaca-cheirosa, manjericão, manjericão-graúdo.

Of African origin, this plant is cultivated throughout Brazil (Albuquerque and Andrade, 1998a).

Material examined: PERNAMBUCO: **Bodocó**, 2/V/1978, *Fernandes and Matos s.n.*, PEUFR 11295. **Carpina**, 22/IV/1987, *Lima and Rita s.n.*, IPA 50872. **Idem**, 22/IV/1987, *Lima and Rita s.n.*, IPA 50873. **Caruaru**, Murici, 25/IV/1995, *Albuquerque 48*, UFP 11291. **Idem**, Murici, 25/IV/1995, *Albuquerque 49*, UFP 11291. **Goiânia**, 13/II/1990, *Lima 525*, IPA 52497. **Idem**, 13/II/1990, *Lima 527*, IPA 52499. **Olinda**, VIII/1998, *Santana s.n.*, IPA 57065. **Pesqueira**, Jardim Residencial, 26/IV/1995, *Albuquerque 56*, UFP 11293. **Poção**, PE 197, 26/IV/1995, *Albuquerque 54*, UFP 11292. **Idem**, PE 197, 26/IV/1995, *Albuquerque 55*, UFP 13721. **Recife**, 12/V/1993, *Silva s.n.*, PEUFR 14328. **Idem**, Cidade Universitária, I/1985, *Pires 1*, UFP 4264. **Idem**, Arruda, 21/IV/1993, *Albuquerque s.n.*, UFP 8754. **Idem**, Dois Irmãos, 1/VI/1993, *Albuquerque s.n.*, UFP 8762. **Idem**, 14/X/1994, *Barros and Silva s.n.*, UFP 10720. **Tapera**, Ipojuca, IX/1929, *Pickel s.n.*, IPA 4812.

***Ocimum campechianum* Mill.**

Vernacular: Alfavaca, alfavaca-brava, manjericão, manjericão-branco.

Plant widespread through Tropical America, including Brazil. Cultivated and common in the Caatinga (Albuquerque and Andrade, 1998a).

Material examined: PERNAMBUCO: **Afrânia**, 21/IV/1971, *Heringer et al. s.n.*, IPA 19103. **Idem**, 11/VI/1993, *Heringer et al. s.n.*, PEUFR 4236. **Alagoinha**, Fazenda Cajueiro, 27/IV/1995, *Albuquerque 69*, UFP 11286. **Idem**, Fazenda Cajueiro, s.d., *Albuquerque 35*, UFP 10438. **Carpina**, 1986, *Bedi 132*, IPA 51600. **Caruaru**, Murici, Jardim Residencial, 25/IV/1995, *Albuquerque 52*, UFP 11288. **Idem**, Murici, 25/IV/1995, *Albuquerque 53*, UFP 11289. **Idem**, Murici, 25/IV/1995, *Albuquerque 51*, UFP 11290. **Goiânia**, 14/VII/1992, *Azevedo 18*, IPA 53314. **Parnamirim**, 18/VI/1984, *Araújo 160*, IPA 42699. **Idem**, 18/VI/1984, *Araújo 160*, PEUFR 7471. **Idem**, Km 27, 18/VI/1984, *Araújo 160*, UFP 6339. **Paulista**, Pedreira de São Bento, 14/IX/1961, *Tavares 800*, UFP

Ocimum gratissimum L. *

Vernacular: Alfavaca, alfavaca-de-caboclo, louro, louro-cheiroso.

Plant widespread in Tropical America, native of Africa (*Albuquerque* and *Andrade*, 1998a). Common as ruderal in Pernambuco.

Material examined: PERNAMBUCO: **Caruaru**, Vertentes, 30/XI/1927, *Pickel s.n.*, IPA 4833. **Idem**, Murici, 25/IV/1995, *Albuquerque* 50, UFP 13722. **Idem**, Brejo dos Cavalos, 25/IV/1995, *Albuquerque* 47, UFP 11283. **Goiana**, 30/V/1935, *Pickel s.n.*, IPA 4834. **Gravatá**, 9/VII/1965, *Guedes* 20, PEUFR 9879. **Maraial**, 28/II/1966, *Guedes* 57, PEUFR 9876. **Idem**, 9/VII/1965, *Teixeira* 2746, PEUFR 9877. **Olinda**, Centro Nordestino de Medicina Popular, VIII/1998, *Santana s.n.*, IPA 57042. **Idem**, Bairro Novo, 8/IX/1994, *Barbosa* 2, UFP 10719. **Pombos**, 1/I/1929, *Pickel s.n.*, IPA 7005. **Recife**, Graças, 30/VIII/1989, *Lima s.n.*, PEUFR 10556. **Idem**, Ibura, 10/V/1991, *Krusch s.n.*, PEUFR 11544. **Idem**, Torre, Terreno Baldio, 20/X/1976, *Correia* 9, UFP 4144. **Idem**, Água Fria, 29/V/1984, *Silva s.n.*, UFP 4217. **Idem**, Cidade Universitária, II/1985, *Pires* 5, UFP 4274. **Idem**, Curado, Jardim Botânico, 21/VIII/1989, *Lemos* 2, UFP 7738. **Idem**, Cidade Universitária, 23/VI/1993, *Balbino s.n.*, UFP 8964. **Idem**, Cidade Universitária, s.d., *Santos s.n.*, UFP 10900. **São Lourenço da Mata**, Reserva Ecológica do Tapacurá, 6/VI/1995, *Albuquerque* 74, UFP 11284. **Taquaritinga do Norte**, 7/VI/1995, *Albuquerque* 77, UFP 11280. **Triunfo**, Próximo divisa com a Paraíba, 26/II/1986, *Lima and Gallindo* 114, IPA 48526. **s.l.**, XI/1936, *Vasconcelos Sobrinho s.n.*, UFP 153.

Ocimum minimum L. *

Vernacular: Manjericão-miúda.

Native to Africa (Corrêa, 1926). Cultivated as medicinal in throughout Brazil.

Material examined: PERNAMBUCO: **Recife**, Arruda, 21/IV/1993, *Albuquerque* 16, UFP 8755.

Ocimum tenuiflorum L. *

Vernacular: Tulase.

Native to Asia, cultivated in Brazil (*Albuquerque* and *Andrade*, 1998a). Used as medicinal in the Old World (Nuñez and Castro, 1992).

Material examinado: PERNAMBUCO: **Goiana**, UEP de Itapirema, 12/II/1990, *Lima* 532, IPA 52495. **Idem**, 4/XI/1994, *Cáceres* 7, UFP 10711.

Ocimum transamazonicum C. Pereira

Brazilian species of the genus *Ocimum*. It is found inhabiting areas of savanna in the states of Maranhão, Pará, Pernambuco (forest zone) and Tocantins (*Albuquerque* and *Andrade*, 1998a; *Albuquerque*, 1998).

Material examined: PERNAMBUCO: **Recife**, Bongi, Arredores do IPA, 28/VI/1974, *Andrade-Lima* 74-7766, IPA 30189.

Eriope Humb. and Bonpl. ex Benth.
Eriope crassipes Benth.

As with the entire genus, this species is widely distributed, showing great variation in morphology according to geographic environment (Harley, 1976). This species has been recorded from Pará, Mato grosso, Goiás, Brasília, Minas Gerais, Rio de Janeiro, São Paulo and Paraná, as well as some areas of Bahia (Harley, 1976). In Pernambuco occurred in caatinga zone.

Material examined: PERNAMBUCO: **ArcoVerde**, margem da estrada Ibimirim a Petrolândia, 13/XII/1954, *Andrade-Lima* 54, IPA 7562.

Eriope cf. macrostachya Mart. ex Benth

This species occur in mountain areas of southern Bahia, extending from Paraná to Paraguay (Harley, 1995). Occur in caatinga zone of Pernambuco.

Material examined: PERNAMBUCO: **Buíque**, Serra do Catimbau, 19/VIII/1994, *Rodal* 305, PEUFR 17387.

Hyphenia* (Mart. ex Benth.) Harley**Hyphenia salzmannii* (Benth.) Harley**

Vernacular: Alfazema-brava, barrigudinha.

It is a very frequent plant in the Caatinga, especially in mountain areas of northeastern Brazil, and is also recorded from Roraima (Harley, 1995). In Pernambuco, it was found from the forest zone to the caatinga zone.

Material examined: PERNAMBUCO: **Afrânia**, 1984, Pereira s.n., IPA 49887. **Buíque**, 25/V/1970, Xavier Filho s.n., UFP 2382. **Idem**, 21/X/1996, Baracho and Siqueira 245, UFP 22269. **Idem**, 18/VIII/1994, Rodal 266, PEUFR 17322. **Gravatá**, no campo, 18/IV/1983, Chiappeta s.n., IPA 31982. **Idem**, 22/X/1960, Tavares 539, UFP 514. **Idem**, VII/1926, Pickel s.n., IPA 4816. **Ibimirim**, 2/VI/1982, Ataide et al. s.n., IPA 28774. **Ipubí**, 10/VI/1992, Pereira et al. s.n., IPA 55017. **Parnamirim**, 11/VI/1984, Araújo s.n., IPA 42669. **Idem**, 11/VI/1984, Araújo s.n., PEUFR 7499. **Petrolina**, CODEVASF, 21/XII/1982, Fotius s.n., IPA 31546. **Recife-Petrolina**, 1979, Andrade-Lima et al. s.n., IPA 46460. **Tacaratu**, 6/X/1983, Gallindo et al. 26, IPA 43404. **Tapera**, Ipojuca, 15/X/1960, Miranda s.n., PEUFR 74. **Trindade**, 26/IV/1983, Gallindo et al. s.n., IPA 42572. **Idem**, 33 Km após Ouricuri, 26/IV/1983, Gallindo et al. s.n., PEUFR 7375.

Hyptis* Jacq.**Hyptis atrorubens* Poit.**

Vernacular: Hortelã-brava, hortelã-de-boi.

It is found on sandy fields near coastal zones, from Mexico and the Antilles to Brazil (north and northeastern) (Braga, s.d.). In Pernambuco occur from the forest zone to the caatinga zone.

Material examined: PERNAMBUCO: **Caruaru**, 10/IX/1971, Andrade-Lima 71-6484, IPA 25368. **Maraial**, Engenho Curtume, 13/X/1996, Siqueira Filho et al. 181, UFP 15751. **Idem**, Engenho Curtume, 30/VII/1997, Baracho 671/624 et al., UFP 22628. **Palmares**, 22/XI/1933, Pickel s.n., IPA 4807. **Recife**, Beberibe, IX/1936, Vasconcelos Sobrinho s.n., IPA 218. **Idem**, 3/VII/1958, Andrade-Lima 58-5950, IPA 21239. **Idem**, IX/1936, Vasconcelos Sobrinho s.n., PEUFR 154. **São Bento do Una**, VII/1926, Pickel s.n., IPA 4805. **Idem**, 7/IX/1931, Pickel s.n., IPA 4806. **São Lourenço da Mata**, 26/VII/1980, Andrade-Lima and Bocage 8, IPA 26626.

***Hyptis brevipes* Poit.**

Vernacular: alfazema-braba, alfazema-brava

In Brazil it is distributed throughout the Northeast and is apparently restricted to the coast in the south (Harley, 1985). It was found in forest zone of Pernambuco

Material examined: PERNAMBUCO: **Correntes**, 4/XII/1985, Lima 41, IPA 48423.

***Hyptis calida* Mart. ex Benth.**

In Brazil, it is distributed in the northeast. The collection place in Pernambuco was not specified.

Material examined: PERNAMBUCO: **s.l.**, s.d., Pickersgill et al. s.n., IPA 20542.

***Hyptis fruticosa* Salzm. ex Benth.**

In Brazil it is distributed in the northeast. In Pernambuco it was found from the forest zone to the caatinga zone.

Material examined: PERNAMBUCO: **Buíque**, Serra do Catimbau, 27/IV/1995, Albuquerque 63, UFP 11045. **Idem**, 27/IV/1995, Albuquerque 64, UFP 11029. **Idem**, 27/IV/1995, Albuquerque 68, UFP 11028. **Idem**, 27/IV/1995, Albuquerque 66, UFP 11024. **Idem**, 27/IV/1995, Albuquerque 65, UFP 11023. **Idem**, 27/IV/1995, Albuquerque 67, UFP 11030. **Idem**, Estrada Buíque-Catimbau. Sítio Bom Jesus, 21/X/1996, Baracho and Siqueira-Filho 272 et al., UFP 22002. **Idem**, Estrada Buíque-Catimbau, V/1995, Andrade et al. 36, PEUFR 18627. **Idem**, Serra do Catimbau, 16/IX/1994, Sales 367, PEUFR 17426. **Idem**, 17/X/1994, Sales 409, PEUFR 17426. **Gravatá**, 6/II/1966, Andrade-Lima 66-4460, IPA 13891. **Recife**, 2/II/1981, Ehrendorrfer 318, IPA 44597.

***Hyptis* aff. *lanceolata* Poir.**

In Brazil it is distributed in the northeast. In Pernambuco occurs from the forest zone to the caatinga zone.

Material examined: PERNAMBUCO: **Caruaru**, Murici, Brejo dos Cavalos, Parque Ecológico Municipal, Costa e Silva 202, PEUFR 18362. **Tapera**, Ipojuca, 2/X/1931, Pickel s.n., IPA 4809. **Idem**, 22/IX/1924, Pickel s.n., IPA 7006. **Idem**, 30/XI/1927, Pickel s.n., IPA 7000.

***Hyptis lantanifolia* Poit.**

This species occur in north, southeast and northeastern Brazil. It occurs in coastal and forest zone of Pernambuco.

Material examined: PERNAMBUCO: **Goiana**, 30/V/1935, *Pickel s.n.*, IPA 4811. **Prazeres**, Jaboatão, 9/VI/1933, *Pickel s.n.*, IPA 4810.

***Hyptis lappacea* Benth.**

According to available literature, this species occurs in the southern Brazil. In Pernambuco occurs in the forest zone.

Material examined: PERNAMBUCO: **Recife**, Curado, 17/VIII/1958, *Andrade-Lima* 58-5753, IPA 20994. **Saltinho**, Rio Formoso, 2/IX/1954, *Falcão et al.* 887, IPA 7872.

***Hyptis leucocephala* Mart. ex Benth.**

In Brazil it is distributed in the northeast. In Pernambuco occurs in the caatinga zone.

Material examined: PERNAMBUCO: **Afrânia**, Margem da estrada, 2 Km em direção ao Piauí, 22/IV/1971, *Heringer et al.* 285, IPA 19155. **Petrolina**, 4 Km sul do CPATSA, 25/V/1983, *Fotius* 3485, IPA 31448.

***Hyptis cf. macrostachys* Benth.**

In Brazil it is distributed in the northeast. In Pernambuco occurs in the caatinga zone.

Material examined: PERNAMBUCO: **Buíque**, Chapada São José, 21/VI/1975, *Andrade-Lima* 75-8110, IPA 42963. **Triunfo**, 26/II/1986, *Lima and Gallindo* 71, IPA 48592.

***Hyptis martiusii* Benth.**

This species occur in southeastern and northeastern Brazil. In Pernambuco occurs from the forest zone to the caatinga zone.

Material examined: PERNAMBUCO: **Araripina**, 25/VI/1952, *Lima and Magalhães* 52, IPA 5320. **Idem**, 27/IV/1983, *Barreto et al. s.n.*, IPA 42597. **Idem**, 27/IV/1983, *Barreto et al. s.n.*, PEUFR 7244. **Buíque**, 21/VI/1975, *Andrade-Lima* 75-8080, IPA 43000. **Idem**, 13/IX/1997, *Pereira et al.* 1139, IPA 56148. **Idem**, 19/VI/1994, *Miranda et al.* 1767, PEUFR 16800. **Idem**,

***Hyptis paludosa* St. Hil. ex Benth.**

From southeast to northeastern Brazil. It occurs in forest zone of Pernambuco.

Material examined: PERNAMBUCO: **Prazeres**, Jaboatão, 16/I/1935, *Pickel* 3759, IPA 7009.

***Hyptis pectinata* (L.) Poit.**

Vernacular: Alfazema-brava, alfazema-de-caboclo.

It is a widely distributed plant, considered a weed. Its distribution ranges from the coast of Paraná northward throughout the tropical region of South and Central America, the Caribbean, to the United States of America. It was introduced into the tropics from Africa and Asia (Harley, 1985). In Pernambuco it occurs from the coastal zone to the caatinga zone.

Material examined: PERNAMBUCO: **Belém de São Francisco**, Ilha do Meio, 18/VII/1967, *Tenório* 67-311, IPA 14764. **Buíque**, 19/VIII/1994, *Rodal* 284, PEUFR 17468. **Caruaru**, Brejo dos Cavalos, 25/IV/1995, *Albuquerque* 46, UFP 11037. **Idem**, Brejo dos Cavalos, Mata arbórea densa, 22/XI/1995, *Lucena* 74 et al., PEUFR 25491. **Idem**, 3/XI/1995, *Tschá* 322 et al., PEUFR 25492. **Correntes**, Fazenda do Ministério da Agricultura, 3/XII/1985, *Lima* 12, IPA 48406. **Exu**, Serra do Araripe, 5/VIII/1986, *Lima* 292, IPA 49099. **Idem**, beira de estrada, 6/VIII/1986, *Lima* 299, IPA

Hyptis platanifolia Mart. ex Benth.

In Brazil it is distributed through the northeast. In Pernambuco occurs in the caatinga zone.

Material examined: PERNAMBUCO: **Araripina**, Chapada do Araripe, XII/1992, *Carvalho Neto s.n.*, IPA 55889. **Exu**, Fazenda Dourado, Chapada do Araripe, 10/VI/1992, *Pereira* 722, IPA 55008.

Hyptis pulegioides Pohl.

From southeastern to northeastern Brazil. It was found in the forest zone in Pernambuco.

Material examined: PERNAMBUCO: **Tapera**, Campo Alegre, Ipojuca, 31/VIII/1936, *Pickel s.n.*, IPA 4814. **Idem**, IX/1929, *Pickel s.n.*, IPA 7014.

Hyptis recurvata Poit.

It is found from Amazonas to Rio de Janeiro and Minas Gerais (Corrêa, 1975). In forest zone of Pernambuco.

Material examined: PERNAMBUCO: **Prazeres**, Jaboatão, 16/I/1935, *Pickel s.n.*, IPA 4815.

Hyptis suaveolens (L.) Poit.

Vernacular: bamburral, alfazema-de-caboclo, alfazema-brava, alfavaca-brava.

It inhabits open areas of the Caatinga, from the mountain foods to the coast. It is also found in America, Tropical Asia (Corrêa, 1974; Braga, s.d.), Mexico and the Caribbean south to Brazil and Bolivia (Harley, 1995). In Pernambuco occur from the coastal zone to the caatinga zone.

Material examined: PERNAMBUCO: **Afrânia**, 23/IV/1971, *Heringer et al. s.n.*, IPA 19167. **Bucú**, 2/IV/1934, *Luetzelburg s.n.*, IPA 21723. **Exu**, 6/VIII/1986, *Lima* 306, IPA 49199. **Fernando de Noronha**, 18/X/1955, *Andrade-Lima* 55-2190, IPA 8237. **Flores**, 25/V/1971, *Heringer et al. s.n.*, IPA 19809. **Idem**, 25/IV/1983, *Gallindo et al. s.n.*, IPA 42568. **Idem**, 25/V/1971, *Heringer et al. s.n.*, PEUFR 5468. **Idem**, Vilarejo de Barragem, 25/IV/1983, *Gallindo et al. s.n.*, PEUFR 7266. **Gravatá**, VII/1926, *Pickel s.n.*, IPA 4817. **Novo Exu**, 2/VIII/1934, *Luetzelburg s.n.*, IPA 22580. **Parnamirim**, 18/V/1984, *Araújo* 53, IPA 42033. **Idem**, 20/VI/1984, *Araújo* 167, IPA 42707. **Idem**, Km 27, 18/V/1984, *Araújo* 53, UFP 6353. **Idem**, Km 27, 20/VI/1984, *Araújo s.n.*, IPA 7470. **Paulista**, Mata do Caetés, XI/1992, *Gomes s.n.*, PEUFR 21812. **Serra Talhada**, 15/IV/1986, *Ataide* 635, IPA 48781.

Hyptis umbrosa Salzm. ex Benth.

Vernacular: Hortelã-do-mato, bamburral.

According to Harley (1985) it is a ruderal from southern Brazil, from Vale do Ribeira (Paraná) to Vale do Itajaí (Santa Catarina), and extending into Minas Gerais and Goiás (Harley, 1995). In Pernambuco occur from the forest zone to the caatinga zone.

Material examined: PERNAMBUCO: **Bezerros**, Parque Ecológico de Serra Negra, Vegetação arbustiva-arbórea, 5/X/1995, *Silva* 64 et al., PEUFR 21382. **Bonito**, Reserva Ecológica Municipal da Prefeitura de Bonito, 15/II/1995, *Villarouco* 2 et al., PEUFR 1866. **Idem**, 15/III/1995, *Tschá* et al. 34, PEUFR 19157. **Brejo da Madre de Deus** 15/IX/1973, *Andrade-Lima* 73-7475, IPA 29590. **Idem**, 15/VI/1973, *Andrade-Lima* 73-7401, IPA 29756. **Idem**, Fazenda Buriti, Solo pedregoso, 24/V/1995, *Villarouco* 100 et al., PEUFR 18954. **Maraial**, Engenho Curtume, 13/X/1996, *Siqueira Filho* 173 et al., UFP 15748.

Marsypianthes Mart. ex Benth.

Marsypianthes chamaedrys (Vahl) Kuntze

Vernacular: Meladinha.

It is found in the Antilles, Mexico, Central and South America (Braga, s.d.). It is a plant of the

equatorial zone of Brazil. In Pernambuco it occurs from the coastal zone to the caatinga zone.

Material examined: PERNAMBUCO: **Belém de São Francisco**, Ilha do Meio, 20/IV/1967, *Tenório* 67-326, IPA 14779. **Buíque**, Chapada São José, 21/VI/1975, *Andrade-Lima* 75-8089, IPA 46225. **Campo Alegre**, Ipojuca, 3/III/1925, *Pickel s.n.*, IPA 7002. **Caruaru**, 23/X/1927, *Pickel s.n.*, IPA 4822. **Gravatá**, VII/1926, *Pickel s.n.*, IPA 4821. **Ibimirim**, 2/VI/1982, *Ataide et al.* 38, IPA 30034. **Igarassu**, 21/VIII/1954, *Falcão et al.* 755, IPA 7875. **Olinda**, 1916, *Pickel s.n.*, IPA 7133. **Parnamirim**, Km 5, 27/VII/1984, *Araújo* 22, IPA 42037. **Idem**, Solo litólico, Substrato micaxisto, 27/IV/1984, *Araújo s.n.*, PEUFR 7511. **Paudalho**, Granja Iranal, 7/IX/1986, *Coelho* 5, IPA 49060. **Petrolina**, CODEVASF, Área irrigada em Alqueiro, 14/XII/1982, *Fotius* 3217, IPA 31464. **Idem**, Área do CPATSA, 24/VII/1984, *Pinto* 143/84, IPA 41794. **Recife**, Bongi, III/1936, *Vasconcelos Sobrinho s.n.*, IPA 92. **Idem**, Curado, Campo de cultura, 4/X/1958, *Andrade-Lima* 58-5763, IPA 21004. **Idem**, Dois Irmãos, COMPESA, 19/X/1985, *Gallindo* 127, IPA 48477. **Idem**, Bongi, III/1936, *Vasconcelos Sobrinho s.n.*, UFP 155. **Idem**, 5/VIII/1961, *Tavares* 741, UFP 629. **Idem**, Cidade Universitária, 19/III/1985, *Silva s.n.*, UFP 4304. **Serra Talhada**, Proximidades do Hotel Planalto, IV/1971, *Heringer et al. s.n.*, IPA 19520. **Idem**, Serra da Carnaubeira, 22/V/1971, *Heringer et al. s.n.*, IPA 19731. **Idem**, Serra da Carnaubeira, 22/V/1971, *Heringer et al. s.n.*, PEUFR 4212. **Idem**, Hotel Planalto, 22/V/1971, *Heringer et al. s.n.*, PEUFR 6185. **Tapera**, Ipojuca, IV/1928, *Pickel s.n.*, IPA 4823. **Idem**, 26/VI/1934, *Pickel s.n.*, IPA 7015. **Triunfo**, Divisa Triunfo-Princesa, 25/II/1986, *Lima and Gallindo* 17, IPA 48397.

Raphiodon Schauer

Raphiodon echinus (Nees and Mart.) Schauer

Distributed along eastern Brazil. Widespread in northeastern Brazil (Harley, 1995). In Pernambuco occurs from the forest zone to the caatinga zone.

Material examined: PERNAMBUCO: **Araripina**, XII/1992, *Carvalho Neto s.n.*, IPA 55877. **Buíque**, 12/IX/1997, *Pereira et al.* 1081, IPA 56146. **Idem**, 19/IX/1969, *Tenório* 69-1141, IPA 20391. **Idem**, 18/X/1994, *Villarouco* 9, PEUFR 18301. **Idem**, 17/VIII/1995, *Figueiredo* 139 *et al.*, PEUFR 22702. **Idem**, 23/II/1996, *Andrade* 318 *et al.*, PEUFR 23464. **Idem**, Sopé de Serra, Vegetação arbustiva esparsa, 12/I/1996, *Campelo* 28 *et al.*, PEUFR 23508. **Idem**, 18/VIII/1994, *Rodal* 271, PEUFR 18749. **Carnaubeira (Floresta)-Conceição das Crioulas**, 18/V/1971, *Heringer et al. s.n.*, PEUFR 4332. **Condado**, 6/VIII/1992, *Miranda et al. s.n.*, PEUFR 12379.

Aeollanthus Mart. ex Spreng.

Aeollanthus suaveolens Mart. ex Spreng. *

Vernacular: Macassá.

Of African origin. Cultivated as medicinal throughout Brazil.

Material examined: PERNAMBUCO: **Recife**, II/1985, *Pires* 6, UFP 4270. **Tapera**, Ipojuca, 2/XI/1932, *Pickel s.n.*, IPA 4825.

Plectranthus L'Hér.

Plectranthus amboinicus (Lour.) Spreng. *

Vernacular: Hortelã-graúda.

Native to South Oriental Asia. It is found from the Antilles to Southern Brazil (Carriconde et al., 1996). Cultivated as medicinal.

Material examined: PERNAMBUCO: **Caruaru**, SESC, 9/V/1997, *Farias s.n.*, UFP 17970. **Goiana**, 1990, *Lima* 522, IPA 52502. **Idem**, 31/X/1991, *Lima* 539, IPA 52553. **Recife**, Ibura, 19/VIII/1991, *Krush s.n.*, PEUFR 11536. **Idem**, Vasco da Gama, 2/VII/1985, *Silva s.n.*, UFP 4429. **Tapera**, Ipojuca, 5/II/1991, *Pickel s.n.*, IPA 4827. **Idem**, V/1927, *Pickel s.n.*, IPA 4826. **Idem**, s.d., *Pickel s.n.*, IPA 4804.

Plectranthus barbatus Andr. *

Vernacular: Falso-boldo, boldo-do-reino, malva-santa, tapete-de-oxalá, sete-dores.

Perennial shrub, probably of African origin (Santos et al., 1988). Cultivated as medicinal.

Material examined: PERNAMBUCO: **Recife**, Curado, Km 12, PE 232, 13/I/1997, *Farias s.n.*, UFP 16270.

Solenostemon Thonn.

Solenostemon scutellarioides (L.) Codd *

Cultivated as ornamental throughout northeastern Brazil.

Material examined: PERNAMBUCO: **Nova Cruz**, Jardim Residencial, s.d., *Gomes s.n.*, PEUFR 11864. **Recife**, Dois Irmãos, 7/VIII/1993, *Gomes and Eduardo s.n.*, PEUFR 14550. **Idem**, Campo Grande, 10/X/1960, *Miranda s.n.*, PEUFR 75. **Tapera**, Ipojuca, 1/VIII/1924, *Pickel s.n.*, IPA 4828.

Tetradenia Benth.

Tetradenia riparia (Hochst.) Codd *

Vernacular: Mirra.

Species of African origin. Cultivated as ornamental and medicinal.

Material examined: PERNAMBUCO: **Recife**, Vasco da Gama, 5/VII/1985, *Silva s.n.*, UFP 4425.

Subfamily *Pogostemonoideae*

Pogostemon Desf.

Pogostemon patchouly Pellet *

Vernacular: Patcholi, patchouli.

Native to India and Burma (Corrêa apud Di Stasi et al., 1989). Cultivated in Pernambuco.

Material examined: PERNAMBUCO: **Goiana**, UEP de Itapirema, 22/VI/1992, *Azevedo 4*, IPA 52794.

ACKNOWLEDGMENTS

The authors like to thanks to Dr. William Sanders, Departamento de Botânica, Universidade Federal de Pernambuco, for invaluable help with the revision of the english text.

RESUMO

O levantamento da família Lamiaceae no estado de Pernambuco revelou a existência de 20 gêneros aos quais estão subordinadas 46 espécies. Os gêneros com maior número de exsiccatas foram *Hyptis* e *Ocimum*, outros tiveram poucos materiais representativos, existindo aqueles coletados uma única vez. Com relação a distribuição fitogeográfica no estado, 9,1% dos registros de espécies são da Zona do Litoral, 54,5% da Zona da Mata e 36,3% da Zona da Caatinga.
