

**Tannase production by *Penicillium atramentosum* KM under SSF and its applications in wine clarification and tea cream solubilization**

Page 382: the correct title of Figure 4, cited as Figure 3, is:

**Figure 4.** Effect of various carbon sources on tannase production by *Penicillium atramentosum* KM. (Growth conditions: 10g jamun/keekar leaves as substrates (pH 6.5) incubated at 28°C for 96 h, 1:2 substrate: moisture agent.)
