

CARTA AO EDITOR

February 11, 2022.

To Marcos Cueto, editor of *História, Ciências, Saúde – Manguinhos (HCSM)*,

I want to inform you, the editor of *HCSM*, as well as the journal's readers, that I mistakenly cited a source in my article "Hunters, rangers, cougars, and jaguars: human and nonhuman territories at the Argentine-Brazilian border, 1960s-1990s", published in *História, Ciências, Saúde – Manguinhos*, v.28, suppl., December 2021. The wrong reference is located on page 73, and it points to the 2015 article by Hiller et al., "Demography, prey abundance, and management affect number of cougar mortalities associated with livestock conflicts." In my own article (Freitas, 2021), I cite Hiller et al. (2015) to support a point about cougar attacks on human children. However, the article by Hiller et al. does not support that. In fact, the article by Hiller et al. studies the mortalities of cougars resulting from livestock conflict, not cougars attacks on human children. I recognize my error and apologize for any issue this misplaced reference might have caused to Hiller et al., as well as to the readers of *HCSM*.

Sincerely,

Frederico Freitasⁱ

ⁱ Assistant Professor of Latin American History,
North Carolina State University.
Raleigh – NC – USA
